Manufacturing resource planning is a system that is used to effectively plan the use of a manufacturer’s resources. Without replacing these terms, ERP came to represent a larger whole that reflected the evolution of applications. When combined with supporting applications like engineering, inventory, purchasing, and production control, the software suite is called manufacturing resource planning or mrp ii. Jun 19, 2020: manufacturing capacity planning is important because it means you have the right people working on a project, and the monetary resources to deliver quality work on time. Your resource capacity plan isn’t going to be just a matter of comparing work hours against requirements, but help you to create a healthy workplace with scalability as the...
