The lost girls | Spectrum | Autism Research News
Oct 19, 2015 - The picture emerging from studies looking at girls with autism over the past few years suggests this ratio is artificially inflated, either because girls at this end of the spectrum hide their symptoms better, or because the male-biased diagnostic tests aren’t asking the questions that might pick up on autism in these girls — or both.

IEP/Treatment Plan Objective Ideas | Jill Kuzma's SLP
Criteria will me met when <STUDENT> is able to do two of the three listed tasks independently for 4/5 emotions on 2 separate probes.
