---

**Strategic planning** is an organization's process of defining its strategy, or direction, and making decisions on allocating its resources to pursue this strategy. It may also extend to control mechanisms for guiding the implementation of the strategy. Strategic planning became prominent in corporations during the 1960s and remains an important aspect of strategic management. Demand forecasting is part of a company's overall inventory control activities. Inventory control is the process of ensuring your firm has an adequate supply of products and a wide enough assortment of them to meet your customers’ needs. Business continuity planning (bcp) is a similar term more often used in the private sector that focuses on both maintaining service delivery and receiving payment for those services provided. Bcp in the past often referred to computer systems but now applies to all vulnerable resources. Eastern software systems (ess) is the leading provider of enterprise resource planning solutions in India, Africa, and Middle East. Ess has more than 1100 customers across 25+ countries in 20+ verticals. An inventory control system is a system that encompasses all aspects of managing a company's inventories; Purchasing, shipping, receiving, tracking, warehousing and storage, turnover, and reordering. Feb 02, 2017 · production planning control ppt 1. Production planning production planning can be referred to as a technique of forecasting every step in the long process of production, taking them at right time and in the right degree and trying to complete operations at the maximum efficiency.
