This thesis aims to leverage a self-regulatory approach could be the most effective solution to encounter the difficulties and cover.

analytical and empirical perspectives on the interplay of taxation and regulation in the financial sector.

The Incidence of Taxation and Regulation in the Labor Market - Pa Rathsoun - 2012

The Incidence of Taxation and Regulation in the Labor Market - Pa Rathsoun - 2012

The Economics of Natural Resources in Latin America - Osvaldo Manz and Marcela Manz - 2017

Earnings from commodities are extremely important for Latin American countries. Until recently, there has been very little literature on the structure of these industries and on the tax system. This book aims to analyze the trade-offs between the degree of taxation overall, the profitability of the relevant industry and the amount of investment and subsequent production in the region, as well as the relevance of economic policies. This book is based on a broad range of sources, both in Latin America and in the United States. The book provides a comprehensive analysis of the Latin American region's economic institutions, including the economic implications of the region's tax policies. The book concludes with a discussion of the implications of these findings for economic policy in Latin America.

Government and Markets - Edward J. Balassen - 2010

After two generations of emphasis on governmental inefficiency and the need for deregulation, we now see growing interest in the possibility of constructive governance, alongside public calls for new, smarter regulation. Yet there is a real danger that regulatory reforms will rest in outdated ideas. As the financial crisis has shown, market and traditional regulatory failures lead to new, immediate, self-serving and not sufficiently inform or explain our current regulatory challenges. Regulatory studies, long neglected in an atmosphere focused on deregulation, is bringing into this comprehensive book, and the book concludes with a comprehensive analysis of the implications of these findings for economic policy in Latin America.

Environmental taxation and regulation - A. Lamos Bozeni - 2001

Legal regulation of the Economy - Claus Seiden - 2010

The textbook, designed for students, graduate students and teachers of economic universities, provides the basics of the legal regulation of economic activity in the Russian Federation. The concepts of legal regulation of economic relations, state regulation and management in the field of economy are defined, specific features of civil law regulation are highlighted. The general provisions on obligations and contracts are given; the main contracts-types of economic activity are reviewed. Special attention is paid to tax regulation of entrepreneurial activity, legal regulation of banking, and the characterization of crimes in the economic sphere. The foundations of international public and private law are given, international economic, commercial and financial law is considered. The author takes into account the latest changes in Russian legislation.
